Helix Bioworks

A first-in-class oral therapeutic for refractory autoimmune disease

P r o b l e m

2.4 million patients fail first-line biologic therapy each year.

Annual cost to payors exceeds $14 billion.

S c i e n c e

Small molecule compound HB-114 targets a novel intracellular pathway.

Preclinical efficacy demonstrated in two validated animal models.

Technology readiness: TRL 4

R e g u l a t o r y

Pre-clinical stage; IND-enabling studies underway.

Regulatory pathway: FDA 505(b)(1) with orphan drug designation sought.

Intellectual Property

Composition-of-matter patent filed (PCT), exclusive licence from Northgate University.

T e a m

Dr. Ines Moreau - Co-Founder & CEO

Commitment: Full-Time

9 employees

P a r t n e r s h i p s

Signed a joint development agreement with Marrow Clinical Research.

M a r k e t

TAM: $22 billion refractory autoimmune market

SAM: $4.1 billion addressable with an oral therapy

The Round

Raising $3,500,000 pre-seed

Security type: SAFE note

Valuation cap: $12,000,000

Discount: 20%

Non-dilutive funding: $1,100,000 NIH SBIR award

Prior funding raised: $750,000

Runway: 14 months

Monthly burn rate: $180,000

Use of proceeds: IND-enabling toxicology, CMC and a Phase 1 submission.
